

SURFACE PROTECTION

GTI is protected by polyurethane surface treatment applied to the product during the manufacturing process. The PUR surface permanently eliminates the need for sealing or polishing these products over their lifetime, greatly reducing the maintenance costs overall.

INITIAL CLEANING

Remove loose dirt and debris from the newly installed floor using broom or vacuum. Ensure all adhesive residues are removed with due regard to supplier's recommendations. Do not use high abrasive pads or scourers.

Wash floor with a neutral detergent by low speed scrubbing machine fitted with nylon brushes or red pad. Ensure all detergent residues are rinsed and removed from the floor.

DAILY MAINTENANCE

Remove loose dirt with broom or vacuum; damp mop with neutral detergent.

PERIODIC MAINTENANCE

Machine autoscrub with nylon brush as required, or wash floor and buff with red pad at 450rpm.
