TARALAY SECURITE SD		-	404

- For tiles stated as installed at 90°, it is also possible to put them in the same direction if requested by the project management or client. In this case, this type of installation eliminates the effects of surface gloss (matt / shine), but will make the joints more visible.
- Treatment of joints: hot welds are necessary for tiles when they are of a format above 50 x 50cm.
