AREA

2000m²

DEVELOPER

Greengate Aged Care

Gerflor is proud to have its floor and wall products featured inside the St Luke's Green aged care facility that won the prestigious nettletontribe Award for Design Excellence at the Property Council of Australia's National Retirement Living Awards 2017.

Executive Director – Retirement Living at the Property Council of Australia, Ben Myers said the benefits of great design go well beyond a physical building.

“In our sector, great design helps foster a sense of community and warmth, and enables retirement community residents to fully enjoy their village living experience. St Luke's Green has been able to combine tradition with fantastic new facilities to create a terrific new community accessible to all, just a couple of kilometres from the centre of Brisbane,” Ben said.

Located in Brisbane's inner suburbs in Woolloongabba, St Luke's Green is an integrated senior's village which is home to 61 independent living retirement apartments and a 61 suite aged care home surrounding the restored St Luke's Church.
