Yes

Sample was conditioned in accordance with BSEN 13238:2001 at a temperature of 23±2°C and relative humidity of 50±5% for a minimum of 48 hours prior to testing.
The test results relate to the behaviour of the test specimens of a product under the particular conditions of the test, they are not intended to be sole criterion for assessing the potential fire hazard of the product in use.
Each specimen was clamped to a substrate of 6mm thick fibre reinforced cement board prior to testing.
No directional properties, three specimens tested only.
