AWTA Test Report Number: 7-581395-CV

Dear Jutta,

The raw data from the AS/NZS 3837 testing carried out on the AWTA Report numbers above was entered into the BCA Materials Classification excel spreadsheet obtained from the Australian Building Codes Board (ABCB) website and the following Group Numbers calculated:

Report number	Specimen Number	Calculated Group Number
7-581395-CV	1	1
	2	1
	3	1

Please note that the ABCB formula used for this calculation has been shown to give inaccuracies in determining the Group Number for certain materials particularly those that are inhomogeneous. The use of these calculated Group Numbers is taken entirely at the client's discretion. AWTA Product Testing makes no warranty as to the accuracy of this calculation in determining the actual flammability characteristics of a product in a real life situation.

It should be borne in mind that the opinions expressed in this letter are based on a limited number of observations made on a single sample and may be subject to alteration if more detailed testing was to be carried out. We recommend that you have further testing conducted if the information above is critical to your decisions on this product.

Yours faithfully

Sean Bassett
Laboratory Controller
